

➤ Summary

From college computer science courses to a coding bootcamp to a development agency, I've enjoyed creating at every step. I am a software developer that's eager to continue building and growing.

➤ Skills

LANGUAGES: Ruby, Javascript, HTML / CSS, PHP (some), SQL (some), Python (some)

WEB FRAMEWORKS: Rails, WordPress, Laravel, React.js (some)

METHODOLOGIES: Test-driven development, Version control, Object oriented design

➤ Employment

Blueye Creative

May 2015 to Current

Junior Developer

Chicago, IL

- Worked full-stack on apps built with Rails, Django, WordPress, and HTML / CSS / Javascript
- Contributed to both legacy and greenfield codebases
- Helped promote practices such as version control and documentation to existing and new projects

➤ Projects

traxo_api

- Ruby gem to simplify both authorizing users (via OAuth) and creating CRUD interactions with the Traxo API.
- Configurable response formats and error handling
- Documented on GitHub wiki
- Tested with RSpec and WebMock

Posy

- Application for anonymously posting and commenting on complimentary messages for local communities (colleges, etc.).
- Single page for reading, posting, commenting, and flagging content.
- React.js, Rails, RSpec

Judgy

- Application where users upload a photo, answer questions, and then make and receive guesses about answers based only on the photo.
- Laravel (PHP), Javascript, AWS S3, PHPUnit, Gulp, Bootstrap

➤ Education

Dev Bootcamp Chicago

Web Development 2014
