

➤ Summary

As a developer, I began with a handful of computer science courses in college, continued learning at Dev Bootcamp, and cut my teeth at a development agency. Now I'm excited by opportunities to build with a team and continue growing.

➤ Skills

LANGUAGES: Ruby, Javascript, HTML/CSS, PHP (some), SQL (some), Python (some)

WEB FRAMEWORKS: Rails, Laravel (some), React (some), WordPress

OTHER TOOLS / METHODOLOGIES: Test-driven development, Version control (Git), Gulp.js, SASS, Heroku, AWS (some)

➤ Employment

Blueye Creative

Software Developer

Chicago, IL

- Worked full-stack for clients on projects using Ruby on Rails, Javascript, PHP/HTML/CSS, Django (Python), and WordPress
- Contributed to both legacy and greenfield codebases
- Built API for an industry-specific fleet management system using Rails and serving web and mobile clients. Also contributed to the front-end development using React and Redux.
- Built full-stack app for managing video and image files and related data using Rails. Content was uploaded securely to S3, processed and managed on app, and exported upon approval for use by another service.
- Assumed responsibility of hosting ~200 domains for clients via Rackspace

➤ Education

Dev Bootcamp Chicago

Web Development 2014

Completed a 19-week, intensive program teaching the basics of web development. Topics included Ruby, Rails, Javascript, TDD, Git, SQL, pair programming, and empathy.

Hendrix College

B.A. English 2014

Relevant courses: Data Structures, Computing Systems Organization, Foundations of CS, Discrete Math, Calculus
3.88 GPA

➤ Projects

traxo_api

- Ruby gem to simplify both authorizing users (via OAuth) and creating CRUD interactions with the Traxo API.
- Configurable response formats and error handling
- Documented on GitHub wiki
- Tested with RSpec and WebMock

Judgy

- Application where users upload a photo, answer questions, and then make and receive guesses about answers based only on the photo.
- Laravel (PHP), Javascript, AWS S3, PHPUnit, Gulp, Bootstrap

➤ Activities

Baseball Hack Day · Co-Organizer

Co-organized a free, one-day hackathon for baseball and technology enthusiasts. In its first year in Chicago, attendance was around 25 people.

Dev Bootcamp · Mentor

Hour-long pair programming sessions with current students after work. Offered weekly when possible.
