SUMMARY

A software developer with experience building full-stack web applications and APIs at an agency. I love working and learning alongside friendly, knowledge-hungry people.

SKILLS

LANGUAGES: Ruby, Javascript, PHP, Python (some)
WEB FRAMEWORKS: Rails, Laravel (some), Django (some)
TEST FRAMEWORKS: RSpec, Capybara
FRONT-END: jQuery, React.js, CSS / SASS, HTML
OTHER TOOLS: Git & GitHub, Heroku, Amazon AWS (CloudFront, S3), Gulp.js
DATABASE: SQL, ActiveRecord, Redis

EMPLOYMENT

Blueye
Developer   May 2015 to Current

- Full-stack development for numerous clients using Ruby, Javascript, PHP, Python, HTML/CSS.
- Led development of an API for an industry-specific fleet management system using Rails. Also contributed to the front-end development using React and Redux.
- Built full-stack app for managing media files and related data using Rails. Videos and images were uploaded securely to S3, processed and managed on the app, and exported upon approval for use by another service.
- Acquired by Engine Group in July 2016

EDUCATION

Dev Bootcamp
2014
A 19-week intensive bootcamp teaching foundations of web development

Hendrix College
BA English 2014
Graduated with distinction and 3.88 GPA
Relevant courses: Data Structures, Computing Systems Organization, Foundations of CS, Discrete Math, Calculus, Introduction to Robotics

PROJECTS

traxo_api

- Ruby gem to simplify both authorizing users (via OAuth) and creating CRUD interactions with the Traxo API
- Configurable response formats and error handling
- Documented on GitHub wiki
- Tested with RSpec and WebMock

ACTIVITIES

Baseball Hack Day · Co-organizer
A free, one-day hackathon for baseball and technology enthusiasts

Dev Bootcamp · Mentor
Hour-long pair programming sessions with current students after work
